

Zero-Click Content Machine

Automate a week of content in one prompt

creators and solo founders who sell digital products · Difficulty: intermediate

A curated pack of prompts that turn one topic into a full content calendar: hooks, posts, and CTAs. Free starter pack.

Prompts

1. The Content Matrix

Use when: expand one topic into 5 angles

You are a content strategist. Given TOPIC and AUDIENCE, output a 5-cell

Returns: A table with 5 filled rows, each tailored to the audience.

2. Voice Cloner

Use when: match your brand voice

Here are 3 samples of my writing: [SAMPLES]. Extract the voice pattern (

Returns: Rewritten text + a 3-line voice pattern summary.

3. Hook Lab

Use when: 10 scroll-stopping openers

Write 10 opening lines for a post about [TOPIC]. Rules: under 12 words, r

Returns: 10 ranked hooks with the emotion each one triggers.

Skills

1. Auto-title generator

mine competitor titles for patterns

1. Paste 3 competitor titles into the prompt.
2. Ask the model to find the pattern (power words, numbers, curiosity gaps).
3. Generate 10 titles for YOUR topic in that pattern.
4. Pick the best with a second model pass.

```
titles = ['3 titles here']
pattern = llm('what pattern?', titles)
new = llm(f'10 titles in this pattern: {pattern}', topic)
print(new)
```

Two-pass generation: pattern extraction, then creation.

2. Daily post batcher

one prompt, seven posts

1. Give the model your asset link and one topic.
2. Ask for 7 post variants across 4 formats (text, image idea, video script, question).
3. Request a different CTA angle per post.
4. Post one variant per day, staggered.

```
posts = llm('7 variants for TOPIC, link: LINK', formats=['text', 'image', 'video', 'question'])
for p in posts: post(p)
```

Batch generation keeps voice consistent across the week.

Level up

The Pro version adds 30 prompts, 8 video scripts and a fill-in-the-blank content system you can run daily.
